## Erratum

In the article by Davis Davey D, Goulart R, Nayar R, on behalf of the Cytopathology Education and Technology Consortium (CETC), entitled '2013 statement on human papillomavirus DNA test utilization' [*Acta Cytologica* 2014;58:113–116, DOI: 10.1159/000358795], the authors wish to correct the title and text to remove the word 'DNA', as the statement also allows for use of any clinically validated HPV testing method. One RNA testing method is now approved by the Food and Drug Administration in addition to several DNA testing methods. Most of the studies that supported the previous HPV test guidelines involved DNA testing, but it is recognized that other molecular testing methods have demonstrated similar performance. The title and the first sentence should include the words 'human papillomavirus test' instead of 'human papillomavirus DNA test', and statement 1 should be 'HPV testing' instead of 'HPV DNA testing'. The corrected reference should read: Davis Davey D, Goulart R, Nayar R, on behalf of the Cytopathology Education and Technology Consortium (CETC): '2013 statement on human papillomavirus test utilization' [*Acta Cytologica* 2014;58:113–116, DOI: 10.1159/000358795]. The authors regret this error.
