Drug Dosage

The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

120 Prevention of Iron Deficiency in Infancy, Childhood and Adolescence

Andersson, M.; Hurrell, R.F. (Zürich)

132 Efficacy and Safety of Iron Administration in Juvenile Populations

Schumann, K. (Freising); Solomons, N.W. (Guatemala)

Policy Statement

The Nestlé Nutrition Institute was created to provide health professionals with up to date information on nutrition and nutrition-related disorders in order to enable them to continuously improve patient care based on the latest medical and scientific breakthroughs.

One of the key pillars of the Nestlé Nutrition Institute is the *Annales Nestlé*, a pediatric journal that has been published on a regular basis since 1942. It contains review articles on clinical practice and research in all fields of pediatrics with focus on nutrition. Each publication deals with one specific topic, such as diabetes mellitus, HIV and nutrition or infant growth. The *Annales Nestlé* comprises 3 issues each year in 3 languages (English, French and Spanish), and with around 50,000 copies per issue is one of the most widely read pediatric journals in the world.

The *Annales Nestlé* is edited by an independent editorial board of six highly respected professors of pediatrics, thus guaranteeing the medical and scientific impartiality of the journal, and hence the high level of respect and appreciation in medical and scientific circles. The editorial board sets editorial policy, identifies topics to be addressed, selects authors and assesses the articles' contents.

The *Annales Nestlé* are published by S. Karger AG, one of the world's most highly respected scientific and medical publishers.
