

## Acknowledgement to the Reviewers

The editor and the section editors sincerely wish to acknowledge the many reviewers who have generously contributed their time and efforts during 2012 in the appraisal of manuscripts submitted to *Audiology and Neurotology*. These reviewers not only have been of inestimable help in assessing the merit of original research articles but also, by their careful analysis and critique and their general and specific constructive recommendations, have often greatly enhanced the value of these manuscripts. The quality of the journal can be attributed in large measure to the quality of their effort. We are sincerely grateful to:
