Retraction Statement

Paper by Xiying Cao, Liang Gu, Zuxiong Zhang, Weixiang Zhong, Shaoming Guo, and Chunfa Xie entitled “miR-181a-5p restrains non-small cell lung cancer cell invasion and migration by regulating the GTSE1/p53/NF- κ B axis” [Cells Tissues Organs 2022, DOI: 10.1159/000525432]

The authors' accepted manuscript “miR-181a-5p restrains non-small cell lung cancer cell invasion and migration by regulating the GTSE1/p53/NF- κ B axis” [Cells Tissues Organs 2022, DOI: 10.1159/000525432] by Xiying Cao, Liang Gu, Zuxiong Zhang, Weixiang Zhong, Shaoming Guo, and Chunfa Xie has been retracted.

After peer review, the accepted, unedited manuscript was published online as Early View. Before the final Version of Record was published, concerns were identified in the original data underlying the article. Specifically, identical values between experiments were observed in the data underlying Figure 1C and Figure 3G. Patterns in the raw data for Figure 1, Figure 3, and Figure 5 raised concerns about the plausibility of the raw data. The authors stated that the patterns observed in the data occurred by chance. The Editors did not find that the concerns had been addressed satisfactorily and as a consequence have rescinded their original, acceptance decision. Consequently, the published author's accepted manuscript has been retracted.

The authors did not respond within the given timeframe to indicate agreement or disagreement with this decision.
