

## Acknowledgement to Reviewers

The editor-in-chief extends her appreciation to the editorial board members and to all ad hoc reviewers whose comments and criticisms ensure the timeliness and quality of the papers published in this journal. We are especially grateful to those members of the editorial board who, after serving for many years, have retired from the board, and we look forward to the new colleagues who will join us. Finally, we thank all of you, authors and contributors who give this journal the international standing in the research into dementing disorders that it enjoys.
