

- Abatement 342  
Acoustic rhinometry 28  
Adsorption isotherms 277  
Agricultural buildings 182  
Air change rate 143  
– disinfection 17  
– humidification 28  
– pollutants, biological, chemical 5  
– quality 182  
– tightness 97, 143  
Airflow 325  
–, indoor 317  
–, outdoor 317  
Albumin 28  
Ambient volatile organic compounds 216  
Area sampling 192  
Asbestos abatement 192  
Asbestos-containing materials 342  
Asthma 246
- Benzene 216  
Bioaerosols 35  
Building regulations 97  
Built environment 65
- Caravans 233  
Children 246  
Climate zone, China 65  
Computational fluid dynamics 317  
Cooking oil 228  
Costs 75, 342
- Design 75  
– strategy 118  
Distribution 201  
Dose response 303  
Dust 182
- Electricity 157  
Emissions 171  
Energy 75, 284  
– saving 118  
Engineering/work practice controls 207  
Environmental chamber 171  
– cost 201  
– management 201  
– monitoring 216  
– tobacco smoke 246, 303  
Eosinophilic cationic protein 28  
Ethylbenzene 216  
Evaporative cooling 87  
Exposure levels 233
- Fabric thermal storage 102  
Filtration 97  
Flooding 35  
Formaldehyde 233  
Fungi 35
- Gas chromatography/mass spectrometry 228  
Glove-bag 192  
Green tariffs 157
- Health 5  
Healthier buildings 97  
Heat exchangers 118  
– pumps 127  
– recovery 87, 102  
Hospital buildings 17  
– workers 28
- Indoor air quality 35, 44, 277  
– – – model 171  
– pollution 265  
Industrial hygiene 207  
Infection control 17  
Infrared heaters 148
- Kitchens 228
- Lead abatement 207  
– regulations 207  
Lighting quality 335  
Low energy 87, 97  
Lung cancer 303  
Lysozyme 28
- Maintenance 75  
Managing hazardous building materials 342  
Mauritius 44  
Mechanical ventilation 65, 87, 102  
Meta-analysis 303  
Microbalance 277  
Modelling 171, 182, 317  
Myeloperoxidase 28
- Nasal lavage 28  
Natural ventilation 65  
Noise 111
- Occupational exposure 192  
– lead exposure 207
- Odours 97  
Organic emissions 228
- Passive cooling 102  
– draught evaporative cooling 284, 325  
Personal sampling 192  
Photo-voltaic array 87  
PM<sub>2.5</sub> 265  
Polycyclic aromatic hydrocarbons 265  
Prediction 111  
Public health 342
- Regulatory compliance 342  
Renewable energy sources 157  
Residential houses 143  
Respiratory health 246  
Retrofit, lighting 335  
Risk 5
- Sick building syndrome 44  
Sink effect 277  
Size distribution 265  
Source exposure variation 207  
Stack effect 65  
Survey, lighting 335  
Symptoms 44
- Tear film stability 28  
Thermal comfort 148  
Toluene 216  
Toluene/benzene ratio 216  
Top-down ventilation 127  
Total volatile organic compounds 171  
Tuberculosis 17
- Ultraviolet 17  
Urban air pollution 127  
User interfaces 317
- Ventilation 17, 44, 75, 284, 325  
– systems 111  
Volatile organic compounds 277
- Wheeze 246  
Willingness to pay 157  
Wind assistance 87  
– effect 65  
Workplace heating 148
- Xylenes 216
