

- Activated lymphocytes 185
 Aging 215
Aloe vera 27
 Anti-idiotypes 207
 Apoptosis 244, 263
 Autoantibodies 207
 Autoimmunity 198
 Biologically active substances 198
 Biotherapy 27
 Bone marrow 6, 165
 Breast cancer families 146
 Carcinoma 256
 CD3-directed lysis 146
 Censorial function 198
 Chemical homeostasis 198
 Circadian rhythms 1
 Compartmental shifting 185
 Cytokines 146, 228
 Dalton's lymphoma 215
 Extracellular matrix 228
 Extravasation 185
 Fas 244
 – ligand 263
 FasL 244
 Flow cytometry 244
 Genetic selection 18, 127
 Glycoprotein Ib/IX 207
 – IIb/IIIa 207
 Hematopoiesis 215
 High, control and low immune response lines 18
 – – – – – , pig lines 127
 HIV positives 157
 Idiopathic thrombocytopenic purpura 207
 IFN- γ levels, serum 157
 Ikaros 137
 IL-2 1
 IL-6 1
 IL-10 1
 IL-12 1, 34
 Immune response 127
 Immunomodulation 157
 Immunomodulator 185
 Immunopathology 198
 Immunophysiology 198
 Immunotherapy 178
 Inflammation 228
 Interleukin-12 178
 Intravenous immunoglobulins 207
 Iscador® 157, 185
 Leukemia 6
 Lymphocytes 244
 Mac-1 34
 Macrophages, splenic 215
 Melatonin 1, 27, 178
 Monocytes/macrophages 228
 Natural cancer therapy 27
 – killer activity 256
 – – cell 6, 146, 165
 – – – precursor 137
 Neuroblastoma 263
 Neuroimmunomodulation 178
 NK cell activity 34
 Ontogeny 137
 Penile neoplasm 256
 Pineal gland 1, 27, 178
 Pleural effusions 244
 Porcine natural killer cell 18, 127
 Recirculation 185
 Recombinant mistletoe lectin 34
 Spleen 165
 Squamous cell 256
 T lymphocytes 263
 Thyroxin 165
 Transgenic/knockout 228
 Transmissible gastroenteritis virus vaccine 18
 Transplantation 6
 Tumor cells 244
Viscum album L 157
