

# Subject Index

- Acetylcholine 33, 295, 303  
 Adenohypophysis 303  
 Adrenal 257  
 Adrenalectomy 7, 129  
 Adrenocortical responses 330  
 Adrenocorticotropin (ACTH) 7, 87, 96,  
   118, 150, 174  
   - release 38  
 Age 114  
 Albumin 335  
 $\gamma$ -Aminobutyric acid (GABA) 145  
 Amphetamine 168  
 Amygdala 50  
 Amygdalotomy 330  
 Androgen receptor 272  
 Angiotensin 248  
 Anterior pituitary 103, 285  
 Area postrema 248  
 Arousal 92  
 Autoradiography 202  
  
 Benzamides 103  
 Beta-endorphin 114  
 Bicuculline 145  
 Biogenic amine levels 197  
 Brain 310  
 Brainstem 257  
  
 Calcium channels 28  
 Carbidopa plus *L*-dopa 213  
 Castration 325  
 Catecholestrogens 225  
 Cell culture 96  
 Central nervous system (CNS) 272  
 Cerebrospinal fluid (CSF) 193, 209, 335  
   - - circulation 70  
 Circadian rhythm 19, 257, 262  
 Circumventricular organs 248  
 Clonal cells 28  
 Corpus striatum 114  
 Corticosterone 1, 19, 38, 118, 129, 174,  
   257, 278, 330  
 Corticotropin-releasing factor (CRF) 87,  
   174  
 Cortisol 92, 193  
 Cushing's disease 150  
  
 D-600 155  
 Degree of inhibition 38  
 Deoxycorticosterone 129  
 Depolarization induced-release 155  
 Development 168  
 Dexamethasone 38, 150, 174, 330  
   - suppression test 92  
 Distribution 355  
*L*-Dopa 213  
  
 Dopamine (DA) 24, 42, 65, 150, 168, 187,  
   213, 229  
   - receptors 103  
 Dorsomedial hypothalamic nucleus 134  
 Drinking 248  
  
 Empty sella syndrome 70  
 Encephalotomy 285  
 Epinephrine 257  
 Estradiol 14, 19, 57, 139, 202, 355  
   - benzoate 134  
 Estrogen 42  
 Estrous cycle 24, 295, 303  
 Ether stress 7  
 Ewe 217  
  
 Female hamsters 234  
 Follicle stimulating hormone (FSH) 14,  
   19, 82, 242  
  
 Gamma-globulin 335  
 Gonadotropins 325  
   - -releasing hormone 1, 42  
   - secretion 317  
 Grafted pituitary 139  
 Growth hormone (GH) 65, 213, 335  
   - of dwarf mice 350  
   - of hypox rats 339  
  
 Hamster 325  
 Hippocampus 50  
 Human 209  
 6-Hydroxydopamine 65  
 Hyperadrenocorticism 197  
 Hyperprolactinemia 42  
 Hypophyseal stalk transection 14  
 Hypophysectomy 139  
 Hypothalamic deafferentation 278, 317  
   - lesions 370  
 Hypothalamus 96, 114, 174, 179, 197,  
   202, 229, 234, 295, 355  
  
 Immature female rats 19  
 Immobilization stress 278  
 Immunochemistry 96  
 Immunocytochemistry 129  
 Immunocytology 285  
 In situ 202, 355  
  
 Lactation 229  
 Lipotropin 209  
 Lordosis 50  
   - behavior 225  
 Luteinizing hormone (LH) 14, 19, 57, 78,  
   82, 217, 242, 278, 364  
   - - inhibition 317  
   - - release 1  
   - - -releasing hormone (LHRH) 14, 96,  
     155, 163, 179  
 Lysine vasopressin 150  
  
 Mating behavior 266  
 Medial basal part of the suprachiasmatic  
   area 242  
 Median eminence 24, 87, 129  
 Medial basal hypothalamic (MBH) 155,  
   163  
 Melatonin 193, 262  
 Membrane potential 28  
*Mesocricetus auratus* 325  
 Metabolism 355  
 Mice 272  
 Mn<sup>2+</sup> 155  
 Monkey 202, 355  
 Multiple sclerosis 335  
 Multiunit activity 217  
 Muscarinic receptors 33, 295, 303  
 Muscimol 145  
  
 N-acetylserotonin 262  
 Naloxone 82  
 Natural steroid 38, 174  
 Negative feedback 325  
 Neonatal androgen 108  
 Neonatal testosterone 234  
 Neurohypophysis 33  
 Neuroleptics 103, 370  
 Neurophysin 129  
 Nomifensine 213  
 Noradrenergic system 317  
 Norepinephrine 24, 65  
  
 Oestrogens 217  
 Olfactory bulbectomy 266  
 Opiates 163  
 Opioid peptide 82  
 Organ culture 285  
 Organum vasculosum laminae termina-  
   lis 248  
 Ovariectomy 78, 225, 364  
 Ovulation 82, 317  
  
 Phenylethanolamine N-methyltrans-  
   ferase 257  
 Photoperiodism 266  
 Picrotoxin 145  
 Pinealectomy 262  
 Pineal gland 266  
 Pituitary 174, 310  
   - cell implantation 350  
   - function 70  
   - hollow fiber units 339, 350

- isolation 42
- Posterior pituitary 33
- Precursor 209
- Prednisolone 38
- Preoptic area 295
- Pressor effect 248
- Primate 193
- Progesterone 50, 57, 355
- Progesterin 202
- Prolactin (PRL) 65, 103, 139, 150, 229, 242, 278, 370
  - release 145
  - secretion 28
- Pulsatile discharges 78
  - LH 42
  - LH release 134, 187
  - secretion 139
- Quinuclidinyl benzilate 33
- Rat 78, 179
  - fetus 285
- Receptor binding 310
- Refractoriness 325
- Regulation of ACTH secretion 118
- Reproductive cycle, annual 325
- Rest-activity cycle 364
- Rhesus macaque 42
  - monkeys 92
- Rhythms 193
- Scanning electron microscopy 96
- Sella turcica 70
- Sensory stimulation 330
- Septum 50
- Serotonergic neurons in brain 118
- Serotonin 7, 50, 118, 134
- Serum 262
- Sex dimorphism 295, 303
- Sexual differences 108, 168
  - behavior 234
- Short-day exposure 266
- Sites of feedback 57
- Social conflict 272
- Somatostatin (SRIF) 155, 163, 335
- Stress 92
- Striatum 168
- Subfornical organ 248
- Synthetic steroid 38, 174
- Testosterone 266, 272
- Tetrodotoxin (TTX) 155
- Thyroliberin 310
- Thyrotropin releasing hormone (TRH) 28, 150, 310
- Tuberoinfundibular dopamine neurons 108
  - dopaminergic neurons 24
- Ultradian rhythm 364
- Vaginal cyclicity 234
- Vasopressin 87, 248
- Voltage-dependent calcium channels 155
