Subject Index Vol. 98, 2004

- Adrenals p37
 Adriamycin p58
 Alcohol p9
 Aldosterone p37
 Aminoglycoside p53
 Angiotensin II p107
 – receptors p58
 Blood pressure p31
 Bumetanide p16
 Calbindin D28k p16
 Calcium p15, p21, p64
 Calcium oxalate p37, p43, p48
 Chronic renal failure p1
 Cilazapril p58
 Citrate p15
 CYP11B2 p37
 Crystal formation p43
 – volume p31
 Crystalluria p31
 Dietary risk factors p55
 Distal convoluted tubule p16
 Diuresis p9
 End-stage renal failure p1
 Endothelin p89
 Endothelin-converting enzyme p89
 Enzymuria p8
 Ferritin p107
 Fibre p64
 Gene polymorphisms p1
 Gentamicin-induced acute tubular necrosis p97
 Genetic markers, risk factors p1
 Glomerular disease p73
 – filtration rate p1
 Glomerulonephritis p8
 Glomerulopathy p58
 Glycopeptide p53
 Heme oxygenase-1 p107
 Hyperoxaluria p48
 Hypertension, hemodynamics p1
 IgA nephropathy p1
 Infrared spectroscopy p31
 Inhibitors, promoters p37
 Intestinal absorption p64
 Iron overload p107
 23-kD protein p23
 Kidney calculi p43
 – model p21
 – stone(s) p55
 Lactobacillus p48
 Ligustrazine p80
 Lipiduria p45
 Lipoproteins p45
 Losartan p58
 Macrophages p97
 Macromolecules p37
 Magnesium p15, p64
 Magnetic resonance spectroscopy p53
 Map kinases p97
 Morphology p31
 Nanobacteria p48
 Natriuresis p89
 Nephrectomy p37
 Nephrolithiasis p43, p48, p55
 Nephrotic syndrome p45
 Nephrotoxicity p53
 Nitric oxide p80
 Nuclear factor-κB p97
 Osteopontin p43
 Oxalate(s) p21, p48, p64
 – stone formation p23
 – stress p23
Oxalobacter formigenes p48
 Oxaluria p48
 PAF-acetylhydrolase p45
 Passive Heymann nephritis p80
 PCR p16
 pH p64
 Polymorphonuclear leukocytes p8
 Potassium p9
 – excretion p31
 Prostacycline p80
 Proteinuria p1, p45, p107
 Rat p37
 Rats, high/low salt intake p89
 Renal development p73
 – fibrosis p97
 – function p9
 – medulla p89
 – stones p15
 Renin-angiotensin system p1
 Salt balance p89
 Sodium p9
 – excretion p31
 – intake p1
 Stone analysis p31
 Stone-formers p55
 Tamm-Horsfall protein p31
 Thromboxane p80
 Transforming growth factor-β1 p58
 Tubular function p31
 Tubulointerstitial damage p8
 Uric acid p9
 Urinary calculi p48
 Urine p53
 Urolithiasis p21, p37, p48, p64
 Vascular endothelial growth factor p73
 Water metabolism p89
