

Subject Index

- Acid phosphatase 94
- Actin 112
- Acyl ascorbate 245
- Adult liver cells 319
- Albumin 319
- Alpha fetoprotein 319
- Amnion epithelial cells 61
- Amphibia 53
- Amphibian ectoderm 106
- Antibodies 310
- Aplastic anemia 225
- Arthritis 220
- Ascites tumor 245
- Autoimmune thyroiditis 155

- Carcinoembryonic antigen 193
- Cell differentiation 106
- Chemosensitivity 138
- Chemotaxis 128
- Chick blastoderm 170
- Ciliary regeneration 49
- Cloning 220
- Coculture 237
- Collagen production 183
 - synthesis 177
- Colon carcinoma 193
- Colony stimulating factor 225, 275
- Con A 163
- Congenitally athymic (nude) rats 263
- Cyclic nucleotides 106
- Cyclosporine 263
- Cytokeratin(s) 61, 73
- Cytopathology 73
- Cytotoxic T-cell lines 16
- Cytotoxicity 149, 245

- Desmosomes 61
- Diabetes 121
- Differentiation 80, 287
- DL- α* -Difluoromethylornithine 8
- Disulfide bonds 281

- Embryo, chick 94
- Embryogenesis 301, 310
- Embryonal carcinoma 250
- Embryonic development 53
 - metabolism 53
- Epidermal differentiation antigens 338
- Epidermis 163
- Erythroblast differentiation 170
- Erythropoietin 225, 281

- Fat cells 25
- Fat-storing cells 183
- Fetal calf serum 237
- Fibrin clot assay 275
- Flow cytometry 138
- Fragile X chromosomes 40

- Germ cells 94
- Giant myofiber 1
- Glycoproteins 163
- Grafting human split-thickness skin grafts 263
- Granulocyte precursors 275
- Growth curves 138
 - factors 237
- Growth-modulating factors 193

- Hepatocellular carcinoma 319
- Hexokinase 53
- Hormonal imprinting 49, 333
- Human embryonic liver cell differentiation 319
 - keratinocytes 338
 - kidney allografts 16
 - melanoma cells 149
 - skin fibroblasts 25, 177
 - thyroglobulin 155
- Humoral immune system 263
- Hydrocortisone 25
- Hyperinsulinism 121

- Immunocytochemistry 73, 112
- In vitro growth dynamics 177
- Insectivora 112

- Insulin 49
 Interaction 170
 Interferons 212
 Intermediate filaments 61
 Intervertebral discs 121
- Keratin proteins 301
 Keratins 310
 Kirsten murine sarcoma virus 25
- L-cell-conditioned medium 275
 Lactic dehydrogenase isoenzymes 34
 Laminin 128
 Leukemic cells 80
 Lining cells 220
 Lymphocyte 250
 Lysosomes 94
- Macrophage precursors 275
 Megakaryocyte colony-stimulating factor 281
 Melphalan 138
 Mesoderm 170
 Mesothelial cells 61
 Messenger RNA in differentiation 319
 Monoclonal antibodies 61, 212
 Monocyte/macrophages 155
 Motility 128
 Mouse 3T3-4E cells 338
 Muscle biology 1
 – fiber 1
 – physiology 1
- Neuraminidase 225
 Neurobiology 1
 Neuroblastoma 287
 Neutrophils 89
 Normal controls 40
 Nucleotide phosphates 8
 Nude and hairless mutants 163
 – mice 138, 149
- Oncologic alterations 319
 – transformation 193
- P388 leukemia cells 8
 Phorbol esters 128
- Phosphofructokinase 53
 Plaque-forming cells 155
 Polyamine depletion 8
 Preadipocytes 25
 Primary embryonic induction 106
 – endoderm 170
 Proliferation 183
 Prostaglandins 128
 Prostatic carcinoma 34
 Protein synthesis 177
 Proteoglycans 121
 Pyruvate dehydrogenase complex 53
 – kinase 53
- Receptor memory 333
 Regulatory enzymes 53
 Rejection process 263
 Retinoic acid 387
 Retroviruses 212
 Rheumatoid arthritis 220
- Sand rats 121
 Serum- and albumin-free cultures 275
 Sheep red blood cells 155
 Skeletal muscle 1
 Small cell carcinoma, lung 138
 Somatic hybrids 338
 Spermatozoa 112
 Squamous epithelium 301, 310
 Surface antigens 250
 Synovial cells 220
 2',5'-(A)-Synthetase 212
- T-B cells 155
 Telomeric structural changes 40
Tetrahyrena 333
 Thrombopoietin 225
 Transferrin 275
 – receptor 80
 Transformation-regulating agents 193
 Transitional cells 183
 Tumor cell(s) 128, 237
- Ubiquinone, histochemistry 89
- Vimentin 73
