

- Actinobacillus pleuropneumoniae* 35  
*ADAM15* gene 185  
 – – variants 185  
 Adhesion molecules 329  
 Adrenal gland 302  
 Adult human lung 93  
 Alternative splicing, *ADAM15* gene 185  
 Alveolar type II epithelial cell 93  
 Amphoterin 129  
 Angiogenesis 253  
 Ankyrin-repeated protein, PEST/proline-rich region (ARPP) 43  
 Antisense oligodeoxynucleotides 123  
 Aorta 107  
 Apoptosis 261, 274, 281  
 – index 217  
 Apoptotic proteins 314  
 Atherosclerosis 107, 261  
 Autoantibodies 323  
 Autoimmune disease 295
- Biomechanical stresses, endothelium 107  
 Bladder cancer 103  
 Breast cancer 217, 253  
 – –, apoptotic index 217  
 – –, prognosis 217  
 Bronchiolar epithelial cell 93  
 Burn injury 223, 302
- CA 19-9 26  
 C57BL/6/C57BL/KsJ mouse strains 231  
 CD14 302  
 CD44 171, 329  
 CD44v6 329  
 Cell adhesion 19, 171  
 – motility 19  
 Cellular atrophy/involution 77  
 c-Fos 302  
 c-Jun 302  
 – phosphorylation 302  
 Clarithromycin resistance 159  
 Clinicopathologic parameters, gastric carcinoma 267  
*c-myc* 281  
 Collagen 308  
 – type II 70  
 Colon cancer 129  
 Congenital myopathy 43  
 Contact hypersensitivity 1  
 Crohn's disease 274  
 Cyclooxygenase 84  
 Cystic fibrosis 152  
 – – mouse 152  
 – – transmembrane conductance regulator gene 152
- Dexamethasone 295  
 Diabetes 77  
 – (*db/db*) genotype mutation 231  
 Diabetes-obesity syndrome 231  
 Differential gene expression, atherosclerosis 107  
 Digital photochemical microscopy, intracellular hyperlipidemia 77  
 7,12-Dimethylbenz(a)anthracene 253  
 DNA methylation 137  
 DUPAN-2, CA 19-9 precursor 26  
 Dysplasia 84
- E-cadherin 329  
 Edema 287  
 Endometrial cytolipidemia 77  
 Endothelial cells 52, 123  
 Epigenetic alterations, stomach carcinogenesis 137  
 Esophagus carcinoma 84  
 Exon/intron organization 185
- Fatty acid synthase 115  
 Fluid shear stress 107
- GalNAc-T3 12  
 $\beta$ 3Gal-T5 26  
 Gastric adenoma 115, 267  
 – carcinoma 19, 115, 137, 176, 267  
 – –, fatty-acid-binding protein prognostic value 267  
 Gelatinases 308  
 Gene expression, human pancreatic cancer tissue 26  
 – polymorphism 274  
 – regulation, cDNA array analysis 295  
 Glioblastoma 123  
 Growth factor 253
- Hck protein 185  
 Heart-type fatty-acid-binding protein 267  
*Helicobacter pylori* 159  
 Hepatocellular carcinoma 281  
 Heterogeneity, endothelial cells 52  
 Human papilloma virus 314  
 – retina 211  
 Hypercytolipidemia 231  
 Hyperglycemia/hyperinsulinemia 231  
 Hypersensitivity reaction, 2,4-dinitrofluorobenzene 1  
 Hypocretin 211
- Immunization, *Toxoplasma gondii* 144  
 Inflammation 287
- Infliximab 274  
 $\beta_1$ -Integrin 308  
 Interleukins 35  
 Intestinal metaplasia 115  
 Intracellular cytokine 274
- Ki-67 expression 193
- Lck protein 185  
 Leukocyte compartments 287  
 Lipopolysaccharides 246  
 15-Lipoxygenase 261  
 Liver 223  
 – injury 246  
 Liver-type fatty-acid-binding protein 115  
 Lung 287  
 – cancer 193, 323  
 – disease 152  
 – epithelial regeneration 93  
 Lymph node metastasis 176
- Macrophages 59, 129, 185  
 Malignant lymphoma, thyroid 164  
*MDR-1* gene 123  
 Metallothionein 223  
 Microsatellite instability 201  
 Minichromosome maintenance protein 2 (MCM2) 193  
 Mucinous adenocarcinoma 201  
 Multidrug-resistance-associated P-glycoprotein 123  
 Murine CD14 246  
 Muscular dystrophy 43  
 Myofibroblasts 59
- Neutrophils 59  
 NOD/SCID mice, bronchoalveolar epithelial regeneration 93
- Obese (*ob/ob*) genotype mutation 231  
 Ocular vessels 211  
 Oligonucleotides 123  
 Oral squamous cell carcinoma cell invasion 171  
 Orexins 211  
 –, receptors 211  
 Osteoarthritis 70  
 – markers 70  
 Osteopontin 1
- p21 164, 217  
 p27 164, 217  
 p53 193, 201  
*p53R2* gene 103  
 p57 164  
 Pancreatic carcinoma 12  
 – islet B cell 231  
 Periarterial space 287
- P-glycoprotein 123  
 Plasminogen activator inhibitor-1 295  
 Pneumocytes 59  
 Pneumonia 35  
 PRL-3 phosphatase 176  
 Prolidase 308  
 Proliferating cell nuclear antigen 241  
 Proliferative activity, cancer cells 281  
*Propionibacterium acnes* 246  
 Protease-activated receptor 52
- Renal pelvic cancer 103  
 Retina, orexin receptors 211  
 Retinal antigens 323  
 Rheumatoid arthritis 274  
*RUNX3* gene 137
- SAG1 host-targeted antigen 144  
 Sarcoidosis 323  
 Small GTPase *Rho* protein 19  
 Spinal muscular atrophy 43  
 Squamous cell carcinoma, oral 171  
 Src homology 3-binding motif 185  
 23S rRNA 159  
*Staphylococcus aureus* 152  
 Stomach cancer 201, 308
- T cells 1, 185  
 Telomerase, cervical cancer 314  
 Thrombomodulin 295  
 Thymus, apoptosis 261  
 Thyroid, malignant lymphoma 164  
 Tissue involution 231  
 Toll-like receptor 4 302  
*Toxoplasma gondii* 144  
 Transforming growth factor-beta 137  
 Transgenic mice 1, 144, 246  
 Transitional cell carcinoma 103  
 Triglycerides/free fatty acids 77  
 Tumor differentiation 12  
 – necrosis factor-alpha 35, 274, 295  
 Type II diabetes 231
- Ureter cancer 103  
 Uterine cervix carcinomas 329  
 Uveal melanoma cell lines 241
- Vascular endothelial cell 295  
 – endothelium, atherosclerosis 107
