

Subject Index

- Acetic acid 333
– acid-induced ulcers 334
Acetylcholine 184, 215
Adenosine 224
– analogues 224
Adjuvant chemotherapy 107
ADP 16
Adrenergic blockade 161
Age 309
Aged rats 345
Alanyl-*L*-histidinyl-zinc 338, 345
Alkaline phosphatase 345
Aluminium 338
Ambient temperature 309
Amiodarone 316
Amoxicillin 115
Amphetamine 286
– potentiation 327
Ampicillin 115
Amyloidosis 287
Angiotensin 130, 184
ANP 75
Antacid 215
Antibiotics 113
Anticancer drugs 107
Antidepressants 327
Antimicrobial agents 177
Antitumor activity 286
Antiulcer activity 215
Antral G cells 237
Aorta 36
Aortic rings 36
Arachidonic acid metabolites 207
Arg⁹-bradykinin 184
Arrhythmias 161
Arterial blood pressure 16, 57, 75, 286
– thrombosis 16
Artery 16
Aryl hydrocarbon hydroxylase 256
Ascending limb 195
Assay, IL-1 178
ATP 119
ATP-sensitive K⁺ channels 36
Atrial natriuretic peptide 75
Atropine 215
Autonomic nerves 185, 224
Azosemide 195
Bacterial meningitis 113
– sepsis 263
Behavioral despair 327, 328
Benzylpenicillin 115
Bepiridil 316
Bethanechol 119, 219
Bilateral vagotomy 286
Bladder 119
Blastogenic responses 179
Blastogenesis 177
Blood pressure 57, 67, 91, 200
Blood-brain barrier 113
Blood-perfused dog lung lobe 130
Body temperature 309
Bombesin 237
– analogs 237
– antagonists 237
Bone alkaline phosphatase 338
– metabolism 338, 345
– –, effect of aluminium 341
Bovine arterial strip 141
– pulmonary artery preparations 141
Bradycardia 82, 286
Brain 149, 286
Bumetanide 195
Calcification 345
Calcium 24, 124, 316, 345
– channel blocker 16, 215, 246
– influx 25
– ionophore 24
Cancer chemotherapy 350
Canine G cells 237
– lung lobe preparation 131
Carbachol 75
Carbenicillin 115
Carcinogens 256
Cardiac arrhythmias 161
– function 1
– glycoside toxicity 316
– output 82, 200
Cardiovascular function 75
– measurements 287
Carotid artery 24, 184
– – strips 24
Carvedilo 200
Catecholaminergic mechanisms 286
Caudal artery 67
Cefoperazone 115
Cefotaxime 115
Cell culture 238
– isolation 238
– preparation 178
Central nervous system 113, 309
Cenbutindole 98
Cephalexin 115
Cephalosporin 113
Cephalothin 115
Cerebral blood flow 149, 153
– cortex 98
– microvasculature 149
Cerebrospinal fluid 67
Cetrixone 113
cGMP 131
Chemoprotection 231
Chemotherapy 107
Chloramphenicol 113
Chloride reabsorption 195
Cholinergic agents 75
– innervation 224
– receptors 119
– stimulation 119
Cholinesterase 299
Choroid plexus 113
Chronic ethanol intoxication 91
Cimetidine 316
Clindamycin 178
Cloxacillin 115
Cobalt-protoporphyrin 292
Cocaine 309
Collagen 16
Colon 109
Colonic temperatures 167
Concanavalin A 177
Contaminated water reservoirs 231

- Contractile activity 36
 – force 24
 – function 1
 – response 119
 Contraction 119, 124
 Contracture 1
 Copper, antitumour activities 350
 Coronary arterial rings 280
 – artery 16
 – – thrombosis 17
 – blood flow 161, 280
 – flow 1
 Cromakalim 36
 Cu-ATP complex 350
 Cultured cells 237
 Cyclic peptides 189
 Cyclooxygenase 207
 – inhibition 130
 Cyclophosphamide 351
 Cysteamine 215
 Cysteamine-induced duodenal ulcers 216
 Cytochrome P-450 256

 Dalton's lymphoma 350
 Deafness 113
 Defecation 248
 Deoxycorticosterone 67
 2-Deoxy-D-glucose 153
 Desferrioxamine 263
 Development 119
 Dicloxacillin 115
 Diet 68
 Dilatation 124
 Diltiazem 16, 316
 Disseminated intravascular coagulation 309
 Diuretics 195
 Dog 16, 184, 207
 – lung 130
 Dopamine 82, 220
 – β -hydroxylase 82
 – receptors 299
 Drink studies 169
 Drug tolerance experiments 350
 Duodenal ulcers 215, 333

 EDRF 130
 Electrodes 246

 En bloc multiple resection 108
 Endobiotics 256
 Endometrial secretion 224
 Endothelium 24, 141, 149, 280
 Endothelium-derived relaxing factor 130
 Epicardial porcine coronary arteries 280
 Epididymis 49
 Erythromycin stearate 177
 Estrous cycle 225
 Ethanol 91, 207
 Exercise 309
 Exercise-induced heatstroke 309

 Fatty acids 256
 Fecal pellet 246
 Femoral diaphysis 338
 Femur 338
 Fenoldopam 299
 Fetal urinary tract 124
 Flunarizine 316
 Forebrain 153
 – ischemia 153
 Free-flow micropuncture 195
 Freshwater lakes 231
 Furosemide 195
 Fusaric acid 82

 GABA 49
 – receptors 49
 Gastrectomy 107
 Gastric acid secretion 217
 – carcinoma 107
 – emptying 246, 247
 – intubation 178
 – secretion 246
 – ulcers 333
 Gastrin 215, 237
 Gastrointestinal smooth muscle 215
 Genetic hypertension 24
 – obesity 292
 Glibenclamide 36
 Glomerular filtration 75, 200
 Glucose utilization 153
 Goldblatt hypertension 67
 Grooming 286
 Guinea pig 224

 H⁺/K⁺-ATPase 215
 – inhibitors 333
 H₂-receptor antagonists 333
Haemophilus influenzae 113
 Haloperidol 98
 Hamster 184
 Head swaying 286
 Heart 1
 – rate 167, 286
 – – studies 169
 Henle's loop 195
 Hepatic dysfunction 309
 Hepatotoxin 231
 High-performance liquid chromatography 263
 Histamine 119, 141, 215, 246
 HT-2 cell proliferation 177
 5-HT receptors 98
 Human antrum 237
 – isolated bronchus 184
 – urinary bladder 184
 Hydralazine 201
 Hydrochloric acid 215
 Hydroxyindole acetic acid 272
 5-Hydroxytryptamine 272
 – receptors 98
 Hyperoxia 272
 Hypertension 24, 67
 Hypertensive rat 200
 Hypotension 286, 309

 Imipramine 327
 Immunoblot analysis 257
 Immunocytochemistry 239
 Immunomodulatory activities 177
 Implantation 224
 Indometacin 130, 207, 280
 Inorganic phosphorus concentrations 345
 Interleukin 177
 – production 177
 Interleukin-2 177
 Interleukin-4 monoclonal antibodies 177
 Intestinal motility 246
 – myoelectrical activity 247
 – spike activity 246
 Intestine 185
 Intraluminal pressure 141

- Iodoantipyrine 153
 Ionic deterioration 316
 Ischemia 1, 153
 Ischemic myocardial tissue 1
 Isolated human G cells 237
 – intracerebral arterioles 149
 – lung lobe preparation 208
 – perfused heart 2
 – lung 272
 – stomach preparation 237
 – tubules 195
 Isoproterenol 167

 Kidney 195, 256
 Ketanserin 91

 Labetolol 200
 Lacidipine 246
 Lactate dehydrogenase 1
 Lactic dehydrogenase 231
 Left atria preparation 317
 Lethal arrhythmias 161
 Leukotriene C₄ 57
 – D₄ 57
 – E₄ 57
 – responses 58
 Lidocaine 280
 Liver 109, 256
 L-NMMA 141
 Local cerebral blood flow 153
 – – glucose utilization 153
 Locomotor stimulation 286
 Lung 256
 – lobe 207

 M₁ antimuscarinics 333
 Maalox 215
 Macrophages 177, 287
 Maturation 119
 Meclofenamate 1, 130
 Melanotropin 98
 Melanotropin-release inhibiting factor 98
 Meningitis 113
 Mesocolon 109
 Metabolism 272
 Metalloporphyrin complex 292
 Metastatic foci 107
 3-Methylcholanthrene 256
 Methylene blue 130

 Mianserine 327
 Microcystin 231
 Microvasculature 149
 Minoxidil 200
 Mitomycin 107
 Monomethyl-L-arginine 141
 Monoreceptor systems 284
 Morbidity 113
 Mortality 113
 Morphine 287
 Motor activity 286
 Mouse 195
 Mucosal defense 215
 Muscarinic-receptor blockers 215
 Muscimol 49
 Muscle exercise 309
 Myocardial ischemia 1
 Myocardium 316
 Myocytes 1

 Nalmefene 161
 Naloxone 167
 – methobromide 167
 Nasopharynx 256
 Natriuresis 75
 NDGA 207
Neisseria meningitidis 113
 Neonatal bladder 119
 Neurokinin-2 receptor 184
 Neurokinins 184
 Neuronal cell loss 153
 Neurotransmission 224
 Newborn period 113
 Nicardipine 149
 Nifedipine 24, 316
 Nitrendipine 246
 Nitric oxide 141
 Nitroprusside 36
 NO 141
 Noradrenaline 184
 Nordihydroguaiaretic 207
 Norepinephrine 24, 27, 67
 – release 68
 Normotensive rats 57

 Occlusion 161
 Omeprazole 333
 Opiate 167
 Opioid antagonist 161

 Organogermanium 286
 Osmolality 200
 Ouabain 316
 – intoxication 316
 – mechanical dysfunction 319
 Overdose 316
 Ovulation 224
 Ozone 272

 PAF 16
 Pancreas 109, 256
 Pantoprazole 333
 Patients 107
 Pediatric urologist 119
 Penicillin 113
 Pepsin 215
 Peptic ulceration 215
 Peptides 184
 Peptidoleukotrienes 57
 Peritoneal exudate cells 178
 Phentolamine 224
 Phenylalanine 237
 Phenytoin 316
 Physostigmine 299
 Pig 264
 Pinacidil 36
 Pithed rat 91
 – –, preparation 92
 Platelet aggregation 16, 17
 – function 16
 Platelet-activating factor 16
 PMN 177
 Polymorphonuclear leukocytes 177
 Ponds 231
 Portal vein 184
 Potassium 24, 67, 316
 Pregnancy 124
 Pressor response 75
 Production of IL-1 178
 Propranolol 280
 Propyl-methylenedioxyindene 215, 220
 Prostacyclin 1, 130
 – release, myocardial 3
 Prostaglandin 256
 – endoperoxide 1
 Prostate 49
 Protoporphyryn 292

- Pulmonary artery 184
 – circulation 272
 – endothelium 272
 – vascular resistance 130, 207
 – vasculature 272
 Pylorus-ligated rats 219
- Rabbit 119, 184
 Rat tail artery preparation 92
 Receptors 49
 Release studies 239
 Renal autoregulatory 200
 – blood flow 200
 – function 75, 200
 – hemodynamics 200
 – sparing effect 200
 – vasodilation 299
 Reperfusion 161
 Reproductive organs 49
 Respiratory distress syndrome 263
 – system 185
 Retardation 113
 Rhabdomyolysis 309
 Rifampin 231
 Risk factor 309
- Salt sensitive rats 67
 Scopolamine 224
 Seizures 309
 Seminal vesicles 49
 Serotonin 91, 119
 – receptors 98
 Shay rat 333
 Skin 167
 – temperature 167
 Small bowel 246
 Smooth muscle 24, 184
 – cells 36
 Sodium 316
 – excretion 75, 200
 Spinal transection 286
 Spiroperidol 98
 Spleen cell suspensions 178
 Splenocytes 177
- Spontaneously hypertensive rats
 67, 82, 200
 Steroids 256
 Stomach 109
 Strain gauges 246
 Stress-induced ulcers 215
Streptococcus pneumoniae 113
 Stroke 24
 Substance P 119, 184, 185
 Sucralfate 215
 Sudden death 161
 Sulfonylureas 38
 Sulphophenyltheophylline 224
 Superfusion bioassay system
 141
 Survival 107
 – rate 354
 – time 107
 Swine model 263
 Sympathetic nerve 67
- T cell growth factor 177
 Tachycardia 200
 Tachyphylaxis 130
 Telenzepine 333
 Temperature 168, 309
 Tension 37, 280
 Tetraethylammonium 36
 Therapy of meningitis 113
 Thirst 167
 Thrombogenesis 16
 Thrombosis 16
 Thromboxane A₂ 1
 Thrombus 16
 Tolbutamide 36
 Tolerance 327
 Trachea 184
 Transplantable murine lymphoma
 350
 Treadmill 309
 Tryptophan 272
 Tumour growth pattern 350
 – transplantation 350
 Tubules perfusion technique 195
- Ulcer 215
 – healing 333
 Ulceration 215
 Ultrasonography 124
 Urethane 286
 Urinary bladder 119, 124, 184
 – iron elimination 263
 Urine 263
 – flow 200
 Urodynamic abnormalities 119
 Uterus 224
- Vagotomy 286
 Vas deferens 49
 Vascular reactivity 24, 25
 – relaxation 141
 – resistance 24, 82
 – smooth muscle 24
 – strips 24
 – tone 130
 Vasoconstriction 280
 Vasodilation 280
 Vasopressor effect 91
 – response 57
 Vasorelaxation 280
 Venous occlusion 207
 Ventricle 75
 Ventricular infusion 75
 Verapamil 220, 316
 Vesicoureteral reflux 119
 Vinpocetine 153
- Water 200
 – intake 167
 Weanling rats 338
- Xenobiotics 256
- 5-Year survival rate 107
 Yohimbine 67
- Zinc 338
 Zucker rat 292
