

- Acetylsalicylic acid 104
 Activated protein C 17
 Anticoagulant 17, 104
 Antiphospholipid syndrome 104
 Aspirin 43
- Breast cancer patients 88
- Cadmium 82
 Calibrated automated thrombogram assay 98
 Cardiovascular disease 49, 67, 77
 Cell migration 59
 Central venous catheter 30
 Chemotherapy 88
 Chronic toxicity 82
 Cofactor 17
 Colorectal cancer 30
 Community Periodontal Index of Treatment Needs 49
 C-reactive protein 49
 Curcumin 59
- Deep venous thrombosis 24
 Diabetes 72
- Endogenous thrombin potential 98
 Envenoming treatment 1
 Essential thrombocythemia 35
- Factor V 17
 – Va 17
- Fibrinolysis 59
 Flow cytometry 35
- Glycation 72
- H1N1 55
 Hemorrhagic syndrome 1
 Hydroxychloroquine 104
 Hypertension 82
- Idiopathic thrombocytopenic purpura 55
 Inflammation 67
 Influenza A 55
- Lonomia 1
 Lonomism 1
- Molecular approach 1
- Oral contraceptives 24
 Oseltamivir phosphate 55
- Periodontitis 49, 67, 77
 Plasma viscosity 82
 Platelet 72
 – activity 35
 – density 35
 Polymorphisms 98
 Procoagulant toxins 1
 Protein C 49
 – C pathway 88
 Prothrombin fragment 1 and 2 98
- Prothrombotic risk factors 24
 Pulmonary embolism 24
- Saliva 67, 77
 Shear-induced platelet aggregation 43
 Sialic acid 67
 Splenomegaly 104
 Streptozotocin 72
 Stroke 43
- Teenagers 24
 Thrombin 88
 Thromboembolism 30
 Thrombolysis 43
 Thrombosis 88
 Tissue factor 77, 98
 – – pathway inhibitor 98
- Urokinase plasminogen activator 59
- Vitamin C 72
- Warfarin 104
 Whole blood 43
 Wound healing 59
